SUMMARY

Senior backend engineer with a focus on distributed systems and payments infrastructure.

EXPERIENCE

Staff Software Engineer, Lumora Pay (Series B startup) | 2021 - Present

- Led a team of 6 engineers rebuilding the ledger service in Go; cut settlement latency by 63%.
- Designed an event-sourced architecture on Kafka handling 40k transactions per second.
- Fully remote team across four time zones.

Software Engineer II, Northwind Cloud | 2017 - 2021

- Built internal service mesh tooling in Go and Python on AWS (EKS, DynamoDB).
- Reduced on-call pages by 45% through SLO-driven alerting.

Software Engineer, Brightpath Labs | 2015 - 2017

- Java/Spring REST APIs for a logistics platform.

EDUCATION

B.S. Computer Science, University of Michigan | 2011 - 2015

SKILLS

Go, Python, Java, Kafka, PostgreSQL, Kubernetes, AWS, Terraform

Open source: maintainer of a popular Go rate-limiting library (2.3k GitHub stars).
